

40-50%
WATER SAVING

AQUADRIP AUTOMATIC WATERING SYSTEM FOR POTTED PLANTS

END USER'S: HOME/FLAT/BUNGALOW OWNERS.

AMICO+ TAP TIMER

Benefits

- Keeps watering your plants at programmed time when you are away from home
- Helps to conserve water by giving just the right amount of water.
- Since the water is applied directly at the root zone, it leads to increased efficiency.

Dripper

Capillary Micro Stake

Features of Amico+ Tap timer

- Easy to install and dismantle.
- Battery operated controller, hence no need to rely upon electricity supply.
- Easy programming for start time, watering duration & irrigation frequency depending upon climatic conditions.
- All product installed are for Plant irrigation & are UV stabilized.
- Back lighted LCD allows night vision.
- Removable electronic part.
- Amico Tap Timers are available with Single and Double outlets of 3/4" male thread.
- Inlet of Amico Tap timer can be used with 3/4" & 1" Male connector. (Tapping point for system)

Features of Drip Irrigation System

- Pressure Compensating Dripper's gives constant flow of discharge in event of variation of pressure in supply line.

- Various types of drippers are available for different requirements of plants (2 lph, 4 lph & 8 lph) respectively.

- Capillary tube of 3.3x0.8mm available in standard length of 50, 85 & 100cm

Pressure (kg/cm ²)	0.5	1.0	1.5	2.0
Flow (lph)	1.9	2.8	3.6	4.5

- Dripper spaghetti tube is connected to lateral pipe through bayonet Male & Female connector for user friendly installation.

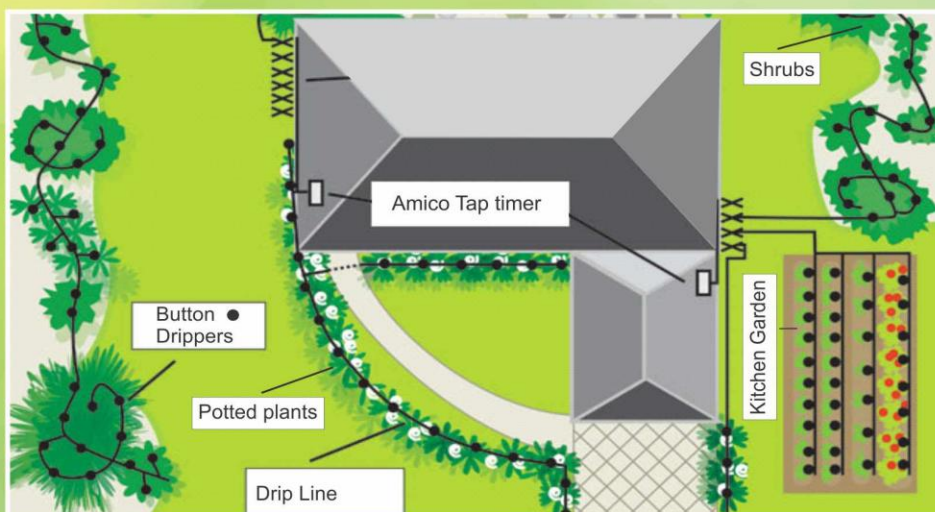

- Bayonet plug is also available to plug the female bayonet fitted on the lateral pipe to shut off the water supply from that location.

- To protect the clogging of dripper's from foreign material available in water, Y shape screen filter is provided along with system.

- All products installed are UV stabilized.
